## KEY APPOINTMENT STRENGTHENS SPECTRUM MANAGEMENT TEAM

Spectrum Inspection Systems, the holding company for leading inspection solutions specialists Loma Systems and Cintex, has appointed Simon Spencer as Group Managing Director. Based in Farnborough, UK, Simon will be responsible for the continued and future success of the popular Loma and Cintex weighing and inspection products. Simon joined Loma Systems in June 2005 as Sales and Marketing Director

Simon spent the last few years living and working in Ireland for the providers of both industrial and retail weighing solutions, Avery Berkel. In his position of General Manager in charge of the company's business in Ireland, Simon gained extensive knowledge and expertise in business development, marketing communications and project management in the global food industry.

Enthusiating about his new role, Simon commented: "Both Loma and Cintex are leading manufacturers of food safety equipment with already successful international customer portfolios. I am looking forward to the challenge of building on this success by helping to develop new opportunities and expand into new markets, as well as continuing to provide support to our traditional markets in Western Europe. Also, with our now well-established overseas manufacturing capabilities, we are in a great position to take full advantage of the burgeoning economic growth in Asia Pacific, Eastern Europe and South America."
