

IQ4H Vertical Fall - Throat Metal Detector

Designed for the Food Industry

Product Highlights

- Gravity feed system for inspecting powders, granules or bulk food products
- Supplied complete with frame, throughput tube and choice of sealed valve or cowbell reject devices
- Tivar anti-static food grade throughput tube as standard
- Air failure and dump valve features included
- Four password protected security levels are provided for Operators, Supervisors, Engineering and Administration

Variable Frequency Provides the Best Detection Levels

The IQ4H Vertical Fall is built using LOMA's Variable Frequency technology that allows detection levels to be optimised around a wide range of differing product conditions

Auto Learn Provides Simple and Fast Set-up

The IQ4H Vertical Fall will automatically set-up and store up to 200 different presets, calibrating for product effect and loose material as the product passes through the system.

Best in Class Detection Levels for Magnetic and Non-magnetic Metals

The IQ4H Vertical Fall offers excellent detection levels

7" Colour Touchscreen

Standard across all of the IQ4H range, the 7" touchscreen offers 33% more space than previous generation metal detectors making operations simple.
